Pharmacists and
Registered Pharmacy
Technicians

(Must be completed by
license renewal 2021)

ONLINE COURSE

Must be completed
by May 31, 2021

REGISTRATION FEE

\$35.00 + GST

Harm Reduction Primer and Opioid Agonist Therapy Standards

Due to an increasing need in the province for harm reduction awareness for healthcare providers, SPCP Council has mandated an introduction to harm reduction and opioid agonist therapy for all pharmacy professionals. CPDPP created this 2.5 hour online course to meet that requirement.

This is mandatory training for all licensed pharmacists and registered pharmacy technicians in Saskatchewan.

LEARNING OUTCOMES

1. Be familiar with opioid agonist therapies available in Saskatchewan.
2. Describe differences between traditional and micro-dosing buprenorphine/naloxone induction.
3. Define trauma-informed-care and identify strategies used to support culturally safe pharmacy practice.
4. Recognize standard requirements for dispensing opioid agonist therapy (OAT) in Saskatchewan.
5. Identify valid prescriptions for opioid agonist therapy (OAT) in Saskatchewan.
