Advanced Course: Harm Reduction and Opioid Agonist Therapy

This is a more comprehensive harm reduction and opioid agonist therapy (OAT) course that covers in-depth OAT therapeutics and includes a live learning session. The live session will be presented by local experts and persons with lived experience and will cover such topics as: trauma-informed care, addiction recovery and treatment, case-based discussions, collaborative communication, and crystal meth usage. **This course fulfills the mandatory requirement for licensed pharmacists and registered pharmacy technicians.**

LEARNING OBJECTIVES

By the end of this workshop, learners will be able to:

ONLINE COURSE

- Explain opioid use disorder (OUD) and the tools used to support diagnosis and evaluate withdrawal.
- Describe examples of community psychosocial support services for patients with OUD.
- Explain OUD treatment recommendations, pharmacology, and clinical considerations.
- Define trauma-informed care and identify strategies used to support culturally safe pharmacy practice.
- Recognize standard requirements for dispensing OAT in Saskatchewan.
- Identify valid prescriptions for OAT in Saskatchewan.

VIRTUAL LIVE WORKSHOP

- Reflect on presenters' lived experiences with substance use disorder (SUD) and recovery, to further support others living with SUD.
- Consider the impact of culture, trauma, and stigma on SUD.
- Describe transitions in care and community resources for people with SUD.
- Understand and identify crystal methamphetamine usage and available resources in Saskatchewan.
- Integrate OAT into pharmacy practice, including considerations for special populations, workflow, claim submissions, documentation, and strategies for suspected misuse or re-direction of OAT.
- Discuss approaches to facilitate healthcare provider and pharmacy team communication and collaborative care.
